

Alturas cut and paste stuff

A.23 - The objective of this project is to develop the Alturas Rancheria's environmental protection capacity. This will involve hiring and training environmental staff, developing an environmental inventory and plan, assessing administrative capacity, coordinating and consulting with various entities, and providing outreach and education to members.

This award provides funding for year one of the Rancheria's first GAP grant and is expected to support work plan activities from 10/01/2013 - 09/30/2014.

B.1.B - This assistance agreement will directly benefit the Alturas Rancheria by providing financial assistance to support planning, development, and continuance of the Tribe's environmental program. Activities will include developing an environmental inventory to identify and prioritize issues, developing a plan to address environmental issues and document environmental goals, assessing Rancheria administrative policies and procedures to ensure they meet grant requirements, attending meetings and otherwise coordinating with tribes and other organizations to learn about and participate in environmental initiatives, and finalizing an emergency response plan, conducting community education related to solid waste and water concerns, and educating tribal members about environmental issues and program activities.

B.5.D - This project supports EPA strategic Goal 3 (Cleaning up Communities and Advancing Sustainable Development) and Objective 3.4 (Strengthen Human Health and Environmental Protection in Indian Country). In completing this project, the Tribe will improve human health and the environment through hiring staff and training them to identify and address environmental issues; developing environmental inventories and plans to document issues, priorities and goals; educating tribal members and others about environmental hazards, etc. **The PRC assigned to the funding for this project is consistent with this strategic goal and objective.**
